

For instance...

This histogram is looking at the **degree** (point:degree) property of all the data within our graph.

Our histogram creates a representation of our graph, broken down into bins.

Things to try:

- *Hover* over the bins to see the nodes or edges highlighted in the graph.
- Click on a bin to create a filter from it

Histogram Panel

To add a new histogram :

1. **Open the histogram panel with the toolbar**
2. Use the search bar to create a histogram for any desired attribute
